## Mammut Filling Mixer AFM 95 3S

# MAMMUT Filling Mixer AFM 95 3S

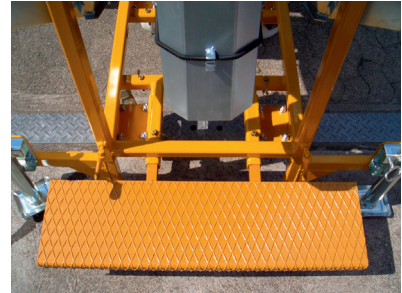

## MAMMUT Filling Mixer AFM 95 3S

Mammut filling mixers are field proven and modified concrete mixers from the manufacturer MAMMUT in Austria. Robust technology, combined with the filling expertise from SAQUICK, guarantees high output for flood protection and dike protection or dam construction. For damp, wet or very coarse sand. Safe and fast.

The SAQUICK filler neck allows both hands to hold the sandbag open to ensure the correct dosage of sand. Filling takes only 2 seconds with this quick opening and closing system. Sandbags sized 30 x 60 cm and silo sandbags with an opening of 24 cm (appropriate filler neck available).

### Technical Data:

- Operative within 10 minutes
- 3 SAQUICK filling spouts for fast and constant filling with correct dosage.
- Standard bags sized 30 x 60 cm (smaller filling spouts for silo bags)
- 3 filling openings with quick open/close system, and bag holder
- Easy filling in 2 seconds, approx. 600 bags per hour possible per opening (corresponds to approx. 1,800 bags / hour / machine = 27 tons of sand)
- Processing moist and wet sand
- Protective grille in the container
- 4.5 kW electric motor, 400 volt
- 240 liter material container
- Container diameter 95 cm
- Galvanized height adjustment
- Removable bag rack
- Accessories, continuously variable height adjustment
- Hopper accessories
- Machine painted
- Other accessories according to the price list
- 3 year guarantee
