SAQUICK Sand Packer SP 2000 4S

SAQUICK
Sandbag Filling Machine
Sand Packer 2000 4S

Sand Packer 2000 4S

The Sand Packer SP 2000 4 S is a machine built by Mammut in Gurten in Austria especially for flood protection. Robust technology, combined with the filling expertise from SAQUICK, guarantees high output.
For damp, wet or very coarse sand. Safe and fast.
The SAQUICK filler neck allows both hands to hold the sandbag open to ensure the correct dosage of sand. Filling takes only 2 seconds with this quick opening and closing system.

The SP 200 4S corresponds in principle to the SAQUICK TITAN machines. The machine can be safely filled from the back with wheel loaders or excavators, while the workers on the front of the machine can fill the sandbags. The hydraulic drive is operated by a Honda petrol engine.

Sandbags sized 30 x 60 cm and silo sandbags with an opening of 24 cm (appropriate filler neck available).

Technical Data:

- Ready for operation in 10 minutes
- 4 SAQUICK dosing filling spouts for fast and continuous filling.
- Standard bags sized 30 x 60 cm (smaller filling spouts for silo bags)
- 4 filling openings with quick open/close system, and bag holder, easy filling in 2 seconds, approx. 650 bags per hour possible per opening (corresponds to approx. 2,600 bags / hour / machine = 39 tons of sand)
- Processing moist and wet sand
- Honda 9.5 HP petrol engine, 100 liter hydraulic oil tank
- Protective grille in the container
- 2000 liter material container
- 300 cm x 125 cm x 240 cm L x W x H
- Machine painted
- Other accessories according to the price list
- 3 year guarantee

Quality made in Germany and Austria and from additional partners across Europe.

SAQUICK sandbag filling machines are proven worldwide in flood and disaster control.
