SAQUICK Sandbag Filling Machine TITAN 1200

SAQUICK Sandbag Filling Machine TITAN 1200

Sandbag Filling Machine TITAN 1200

The TITAN series is a family of machines specially developed for mobile flood protection and the professional filling of sandbags with damp or wet sand.

The TITAN can be permanently filled from the rear with a wheel loader or excavator. The sandbags are filled on the front, for staff safety. Sandbags can therefore be filled this way without and interruption. This ensures a very high filling performance.

Technical Data:

- TITAN gear motor
- Hot-dip galvanized machine
- Ready for operation without any additional accessories
- Operative within 10 minutes
- 2 SAQUICK filling spouts for fast and constant filling with the correct dosage.
- Standard bags sized from 30 x 60 cm and bigger (smaller filling spouts for silo bags)
- 2 filling openings with quick opening and closing system, bag holder, simple filling in 2 seconds, approx. 650 bags per hour possible per opening (corresponds to approx. 1300 bags / hour / machine = 19.5 tons of sand)
- Processing of damp and wet sand with small stones
- Protective grille in the container
- 3.0 kW electric motor with bevel-helical gear, 1000 Nm, 16 A (delay action fuse), 400 V
- Clockwise rotation switch
- Vibration motor with interval control to prevent sand compaction
- 500 liter material container
- Transport dimensions 1.80 mx 1.50 mx 1.80 (LxWxH)
- Dimensions of machine 1.80 mx 2.20 mx 2.30 with opened bulkhead (L x W x H), empty weight 550 KG
- Including height-adjustable and removable storage rack for sandbags
- Including plug-in pouring plate on the container
- Including 4 continuously adjustable supports for ergonomics
- crane eyes
- 4 swivel castors for manoeuvring on a solid surface
- 1.50 m wide material hopper for loading with a wheel loader, excavator or conveyor belt; hopper widths up to 2.0 m available
- 3 year guarantee, CE conformity

Quality made in Germany and Austria and from additional partners across Europe.

SAQUICK sandbag filling machines are proven worldwide in flood and disaster control.

SAQUICK TITAN 1200 Trailer

The Mobile Flood Protection System

SAQUICK TITAN 1200 Trailer

The SAQUICK TITAN 1200 Trailer is based on the proven TITAN 1200 Sandbag Filling Machine and combines the filling machine, power supply and trailer into a fully mobile and self-sufficient deployment system.

The complete unit can be transported directly to the deployment site and is ready for operation within just a few minutes. Thanks to its integrated power supply, the system operates independently of the local infrastructure.

The TITAN 1200 Trailer is ideally suited for fire departments, civil protection agencies, municipalities and organisations involved in disaster response, civil protection and defence.

Technical Data:

- Robust box trailer with loading platform 2,560 × 1,500 × 350 mm
- Heavy-duty plywood floor with 6 lashing rings
- Gross vehicle weight: 1,300 kg
- Payload: 1,020 kg
- Permissible nose weight: 100 kg
- Integrated generator (optional 8 kVA, according to customer requirements)
- Generator mounting bracket
- Standard ball hitch, optional ring hitch
- Overrun brake
- Jockey wheel
- Four telescopic support legs for secure positioning
- Spare wheel mounted on the drawbar
- Four fold-down aluminium side panels
- 10" wheels
- Road-legal lighting system
- Optional 100 km/h approval
- Overall dimensions: 4,000 × 1,500 × 2,500 mm (L × W × H)

Delivery Scope

- SAQUICK TITAN 1200 Sandbag Filling Machine
- Robust box trailer with overrun brake
- Integrated generator
- Fully assembled and self-contained deployment system

The trailer can be individually configured to meet customer-specific requirements and operational needs.

Quality made in Germany and from additional partners across Europe.
