SAQUICK Sandbag Filling Machine TITAN 2400

SAQUICK Sandbag Filling Machine TITAN 2400

Sandbag Filling Machine TITAN 2400

The TITAN series is a family of machines specially developed for flood protection for the professional filling of sandbags with damp or wet sand. The TITAN can be filled permanently from the rear with a wheel loader or excavator.

The sandbags are filled on the front of the machine, for staff safety. Sandbags can be filled this way without any interruption. This ensures exceptional filling performance.

Technical Data:

- Hot-dip galvanized machine
- Ready for operation without any additional accessories
- Operative within 10 minutes
- 4 SAQUICK filling spouts for fast and constant filling with the correct dosage.
- Standard bags sized from 30 x 60 cm (smaller filling spouts for silo bags)
- 4 filling openings with quick opening and closing system, bag holder, simple filling in 2 seconds, approx. 650 bags per hour possible per opening (corresponds to approx. 2,600 bags / hour / machine = 39 tons of sand)
- Processing of damp and wet sand with small stones
- Protective grille in the container
- 5.5 kW electric motor with bevel helical gear, 1700 NM, 400 volt
- 16 ampere (delay action fuse)
- Clockwise Rotation switch
- Vibration motor with interval control to prevent sand compaction
- 1000 liter container capacity
- Transport dimensions 3.30 m x 1.50 m x 1.80 m (LxWxH)
- Dimensions of Machine 3.30 m x 2.20 m x 2.90 m, with opened bulkhead (L x W x H)
- Empty weight 1100 KG
- Including a height-adjustable and removable storage rack for sandbags
- Including a foldable and fixable pouring plate on the container
- Including 4 continuously adjustable ergonomic supports
- Stacker shoes, crane eyes
- 4 swivel castors for manoeuvring on a solid surface
- Material container 3 meters wide for filling with a wheel loader, excavator or conveyor belt
- 3 year guarantee
- CE conformity

Quality made in Germany and Austria and from additional partners across Europe.

SAQUICK sandbag filling machines are proven worldwide in flood and disaster control.
